

## Online Backups

We use multiple brands of online backups to find the best for each customer.

Input Users -----Data storage (Server) -----Cloud-----Online Storage

Online data backup is a method of off-site storage in which data is regularly backed up over a network on a remote server, typically hosted by a service provider. Online backup has become essentially the same as cloud backup.

**Cloud-to-cloud backup solution for Microsoft Office 365's Exchange Online, SharePoint, and OneDrive, Data Server, SQL server and Exchange Servers are some of the products that can be backed-up online.**
