

Service Provider Platform

Whilst many providers are dissatisfied with the complexity in their communications, IPCortex Hosted Providers can expect simplicity throughout. Our solutions require minimal management and are very easy to use, either as a standalone system or integrated with existing applications and processes.

Rapid deployment

Set up new customers within hours. Single or fully divisioned multi-tenant variants allow you to choose how you deliver the service to each customer.

Risk-free, granular pricing

You only pay per user and can grow your system as needed - no large in front investment.

Choice for you and your customer

Openly compatible with a wide range of handsets and other devices for optimum choice to suit you and your customers.

Easy to manage

Intuitive web based configuration model delivers rapid roll out, and streamlined upgrade process ensures minimal ongoing management overheads.

Collaboration from anywhere, for every user

Exceptional customer service tools like web-based interface Keevio and contact centre included as standard.

Flexible and remote working features

Features including night mode, conferencing, video calling, hot desking, call barge and much more.
